

**August 24, 2002**

**Hi Jim,**

**It's been another hot summer, and I used about the same amount of electricity as last year. Our 2500 square foot ranch heats and cools quite comfortably, and at a very affordable price. (Our average cost per month is \$90.00)**

**I also have outside night lights, a hot tub, and a dehumidifier in both the basement and 30' x 60' shop building (both of which run 50% of the time).**

**We believe your "Icynene" has everything to do with this!**

**A very satisfied customer,  
Bob Benedetti  
Lexington, Illinois**
