

Just wanted to pass my thanks on to Tom Newton and his team as they did a wonderful job insulating my residential bathroom and kitchen with the Icynene. It was not a cookie cutter job as it was a renovation with many difficult "older house" challenges. He spent time going over with me what would be sprayed and even provided helpful insight to make the outcome better. The crew did a very professional job prepping and performing the installation. There was very little traces of mess left behind after the job was completed. This is the second time we've used ATC Insulators and I would not hesitate contacting Tom for another insulating project.

Thank You - Ryan and Lorinda / Eureka Residential
